

Taos, NM

(Section 205)

The study is located in Taos, NM. The purpose of the study is to determine Federal interest and optimize a flood damage reduction plan for the city of Taos.

Structures and roadways have been impacted by flows from the surrounding mountains. The city of Taos has been able to reduce flooding to some extent through Federal assistance from USDA. However, there remains a continuing flooding problem. The study will determine Federal interest and an optimal project.

The feasibility cost sharing agreement is scheduled to be executed in May 2002. The feasibility study is scheduled for completion in October 2003.

The City of Taos, NM is the local sponsor for this project.
